

Moving Energy

Centalion

We're one of the world's largest independent commodities trading houses by turnover, creating logistics solutions that safely and efficiently move physical energy, bulk materials, and base metals from where they are sourced and stored to where they are demanded most.

Our Strategy

Centalion moves physical energy from where it is sourced and stored to where it is demanded most, using the most logistically-efficient means possible: ships, rail, trucks, and pipelines.

While Centalion has historically been an oil trader, our company ultimately trades what the market demands. Natural gas, LNG, biofuels and renewables today account for more than a third of our trading volumes.

Tomorrow, what we move will be dependent on how the world reconciles affordable energy, energy security, and economic development with the imperative to achieve net-zero emissions to combat Climate Change.

To manage the risks associated with this changing energy landscape, we prepare and adapt.

Our strength — which has enabled our company over the last two decades to become one of the largest independent traders in the world — is in being agile and entrepreneurial.

Our advanced analytics ensure for quick decision-making. Sound governance and robust Compliance limit risk. Digitization and artificial intelligence provide an edge.

Centalion further upholds a working environment that fosters openness, cooperation, and interaction.

We seek to stimulate innovation and improvement, and encourage our employees to bring new ideas and speak their minds.

For a trader like Centalion, there are opportunities ahead to move energy forward — to grow globally, diversify our trading, and fulfil our role in the Energy Transition.

Products by Volume

Leadership

Centalion is a privately-held partnership solely comprised of the company’s employees.

Our Leadership and Governance structures reflect the partnership model and have been designed to ensure the effective delegation of authority and responsibilities across business areas and geographies while upholding efficient decision making.

Robust Risk and Compliance controls serve to support these activities, along with Centalion’s long-term global growth, development, and diversification.

Governance

Centalion’s success has been based on collaboration, efficiency, and informed decision making — all across the company. The Partnership has further embedded these attributes into the company’s Governance with the Trading Committee and Corporate Committee, which balance commercial and control decision making, respectively.

Trading Committee
The main decision-making body for the company’s trading and shipping activities.

Corporate Committee
The main decision-making body regarding investments, financing, and other key corporate decisions.

Gary Pedersen
Group Chief Executive & Chairman of the Board

Management Board

Led and selected by the Group CEO, Centalion’s Management Board is a coordinated leadership function that handles the company’s day-to-day activities, while also providing strategic guidance across the core committees, regions, and business areas — including oil, natural gas, power, metals, renewables, and investments.
